Santa Maria, CA 05/23/2016—We just gave small-rig drillers an edge. Melfred Borzall's best selling bits, the UltraBit and the Steep Taper UltraBit are now available for rigs 10,000 lbs. or smaller.

Featuring conical carbide cutters, a low-profile design to minimize torque-stealing drag, and chunky carbide hardfacing the entire length of the blade, these 3.5" bits are every bit as aggressive as their larger counterparts. Made to work in the harshest terrain and at 1/2" thick for easier pushes, these small bits will productively drill through tough ground conditions. The new 3.5" UltraBit and Steep Taper UltraBit fit the 2.5" diameter Borzall housing and are compatible with several OEM drill rigs. Increase your production with hard working, long-lasting bits. Get the Borzall edge.

Now on the shelf and ready to ship, these mighty minis are ready to tear into the toughest terrain.
