### **MELFRED BORZALL ADDS TWO NEW DISTRIBUTORS TO THEIR NETWORK**

*Guardian HDD Ltd & HDD Solutions, Inc. triple down Melfred Borzall's distributorship in Canada*

Santa Maria, CA, May 18, 2018— Melfred Borzall has added two new distributors to their network of International distributors. Located in Sherwood Park, Alberta, Canada, Guardian HDD Ltd. joins Melfred Borzall in May 2018 to service contractors all over the entire province of Saskatchewan. Newly-founded business in the brick and mortar sense does not mean HDD Solutions is, by any means, new to the industry. With its aggregated 50 years of experienced salespersons and customer service, it is a promising venture to entrench itself further into a geography that has contractors buzzing with jobs. Also joining the Melfred Borzall tooling distribution chain in Canada, is **HDD Solutions** that will be helping contractors all over Alberta become more efficient in production. HDD Solutions, Inc. also brings a healthy weight in years of experience in the HDD industry to provide customer service and sales support to the ever-growing demand for trenchless drilling in the white north. All of Canada has previously been serviced by only one distributor, so Melfred Borzall has tripled its investment and energy in the vast countryside to meet the ever-growing demand of directional drilling in the Canadian front.

Melfred Borzall is the HDD Industry's leading manufacturer of directional tooling. Engineering and manufacturing tools for drillers for over 7 decades, the company continues to innovate new patented technology and improve upon foundational tooling. With a distributor network covering several continents, Melfred Borzall's reach is ever-expanding.
