

2019 Summer Internship

Full and Part-time **Paid** Positions Available Now

Internship program is open to college students and select high school students.

Real Experience with Real-world Projects

At Melfred Borzall, our internships aren't about getting coffee and doing busy work. We challenge our interns to roll up their sleeves and get experience that will impact their future careers. At our Santa Maria facility, Melfred Borzall designs, manufactures and markets tools used worldwide for underground construction. Our interns work alongside our seasoned team members to get hands-on experience in a dynamic learn-by-doing environment.

General Requirements

Good work habits are essential. We start at 7:00 am! Complete the application form and submit along with your resume and any supporting documents through our portal at www.Melfredborzall.com/internships or email to interns@melfredborzall.com. Submission deadline is March 24, 2019. Select candidates will be interviewed in person. A drug screening (no cost) is required.

Manufacturing Engineering

Gain firsthand experience in Lean processes, fixture design, CNC programming, robotics and facility design with projects that will connect classroom theories to real-world manufacturing.

Mechanical Design

Design at Melfred Borzall is a hands-on process! Interns not only help design new tools but will also help build and test new designs. Solidworks and manufacturing experience is a plus.

Welding & Machining

Work alongside skilled machinists and welders to get experience with CNC machining, MIG welding, plasma cutting, fabrication and other processes. Assignments will vary based on experience.

Marketing & eCommerce

Market analysis, video production, social media marketing, graphic design and e-commerce launch campaigns are only a few of the projects you will help develop.
